Vdiff

Opens two files in vimdiff.

Provides single-stroke key mappings to make updating files efficient.

Arguments

`vdiff` [options] <lfile> <rfile>

Options

`-h, --help`	Show this help message and exit.
`-g, --gui`	Using gvim (rather than vim).

Relevant Key Mappings

CTRL-J	Move to next change.
CTRL-K	Move to previous change.
CTRL-O	Obtain change under cursor from other buffer.
CTRL-P	Push change under cursor to other buffer.
O	Obtain all changes from other buffer.
P	Push all changes to other buffer.
S	Save changes and quit.
Q	Quit without saving changes.

Installation

Runs only on Unix systems. Requires Python 2.6 or later or Python 3.2. Install by running ./install.
